This faculty supervisor for this study is Dr. Indre Viskontas, a professor in the Department of Psychology at the University of San Francisco.

WHAT THE STUDY IS ABOUT:

This study investigates the relationship between certain identity and family attributes and well-being. Therefore, it is important that you respond honestly and take your time with the survey.

WHAT WE WILL ASK YOU TO DO:

During this study, you will be asked to answer questions about your well-being. You will also be asked about identities involving yourself and your family.

DURATION AND LOCATION OF THE STUDY:

Your participation in this study will involve one session that lasts no more than 30 minutes. The study will be conducted online using a Qualtrics survey.

POTENTIAL RISKS AND BENEFITS:

We anticipate minimal risks/discomforts for most participants.

Some questions ask about your identity, and some people may experience mild discomfort or embarrassment from disclosing certain parts of their identity. Questions about well-being may remind you of uncomfortable circumstances. Average levels of fatigue may be experienced while taking the survey. If you wish, you may choose to withdraw your consent and discontinue your participation at any time during the study without penalty.

While there is no direct benefit to you for taking part in this study, your participation helps contribute to the development of scientific knowledge. If you wish to hear about the final results of the study, a report will be emailed to you when data analysis is complete.

PRIVACY/CONFIDENTIALITY:

Your participation in this study will be handled in a confidential manner. Only the researchers will know that you participated, and your data will be identified by a sequential code. Therefore, your name or any identifiable information will not be associated with your data. Only those directly involved in the project will have access to the data and your name will not be connected to your responses. No individual identities will be used in reports of publications resulting from this study. Further, all responses will be pooled for the analysis.

COMPENSATION/PAYMENT FOR PARTICIPATION:

You will receive 30 minutes of credit for your participation in this study. If you choose to withdraw before completing the study, you will still receive the 30 minutes of participation credit.

VOLUNTARY NATURE OF THE STUDY:

Your participation in this research is completely voluntary. You do not have to participate if you do not want to and you can refuse to answer certain questions. Even if you begin the study, you may stop at any time. If you do not participate or decide to quit, your information will be kept confidential. If you decide to quit, you will still receive course credit, and will not lose any rights, benefits, or services that you would otherwise have as a student. In addition, the researcher has the right to withdraw you from participation in the study at any time.
